Notice of Not Fully Responsive Reply for Applications Under Accelerated Examination	Application No. 09/830,784	Applicant(s) LAKOMY ET AL.	
	Examiner Elda Milef	Art Unit 3692	

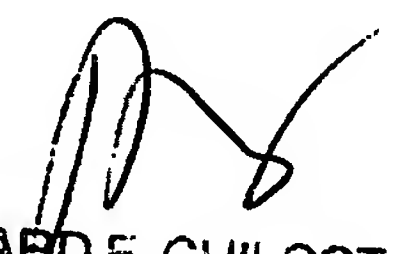

--The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

This application has been granted special status under the accelerated examination program.

The reply filed 25 September 2006 is not fully responsive to the prior non-final Office action because of the following reason(s):

1. ☐ The reply includes an amendment that attempts to add claims which would result in more than three (3) independent claims, or more than twenty (20) total claims.
2. ☐ The reply includes an amendment that attempts to present claims not encompassed by the preexamination search.
3. ☐ The reply includes an amendment that attempts to present claims not encompassed by the accelerated examination support document and an updated accelerated examination support document was not submitted with the amendment.
4. ☐ The reply includes an amendment that attempts to present claims that are directed to a nonelected invention or an invention other than previously claimed in the application.
5. ☐ The reply includes arguments or other items that are not limited to the rejections, objections, and requirements made, such as _____ on page _____ of the reply.
6. ☒ Other (including any explanation in support of the above items): The drawing submitted by the applicant on 9/25/2006 does not comply with the requirements set forth in the MPEP section 601 and 37 CFR 1.81-1.85. Merely placing the limitations of independent claims 5 and 10 in block form do not facilitate the understanding of the subject matter sought to be patented. The applicant has failed to reference the claim to priority of application PCT EP/00/08263 in the first sentences of the specification or in an application data sheet as required under 37 CFR 1.76. Furthermore, the reply by the applicant must be reduced to a writing which distinctly and specifically points out the supposed errors in the Examiner's action. The reply must present arguments pointing out the specific distinctions believed to render the claims, including any newly presented claims, patentable over any applied references.-see 37 CFR 1.111 b-c. It is also suggested that the use of the word "arrangement" in claims 10 to 14 is unclear as it is neither an apparatus nor a method therefore rendering the claims indefinite. Finally, the numbering of the claims is incorrect. Claims 5-10 should be re-numbered as claims 6-15 and the related dependencies should be adjusted accordingly.

The reply has not been entered. Since the above-identified reply appears to be *bona fide*, applicant is give a time period of **ONE (1) MONTH or THIRTY (30) DAYS** from the mailing date of this notice, whichever is longer, within which to supply the omission or correction in order to avoid **ABANDONMENT**. **NO EXTENSIONS OF TIME** under 37 CFR 1.136(a) will be permitted.

RICHARD E. CHILCOT, JR.
SUPERVISORY PATENT EXAMINER
